

## Waste Management Announces Cash Dividend and Authorizes an Additional \$300 Million in Stock Repurchases

November 13, 2007

HOUSTON--(BUSINESS WIRE)--Nov. 13, 2007--Waste Management, Inc. (NYSE:WMI) announced today the declaration of a quarterly cash dividend of \$0.24 per share payable December 19, 2007 to stockholders of record on December 3, 2007.

The Company also announced today that its Board of Directors has authorized the purchase of up to an additional \$300 million in common stock in addition to its current capital allocation plan. The Company's current capital allocation plan lasts through the end of 2007 and provides for \$1.2 billion annually on share repurchases and dividends. In March 2007, the Board of Directors increased the authorization for share repurchases in 2007 by an additional \$600 million. Through the first ten months of 2007, the Company has repurchased approximately \$1.15 billion of stock, or over 32 million shares, and paid cash dividends of \$374 million. From the inception of the capital allocation plans in 2002 through October 31, 2007, Waste Management has returned over \$6 billion in cash to shareholders.

"The Board of Directors and management believe that the current stock price is not reflective of the true value of the Company. Waste Management has continued to produce strong and improving financial results, yet the share price is significantly off its 52-week high," said David P. Steiner, Chief Executive Officer of Waste Management, Inc. "As a result, we believe it is prudent to take advantage of this opportunity for significant return on investment through increased share repurchases."

Waste Management, based in Houston, Texas, is the leading provider of comprehensive waste management services in North America. Our subsidiaries provide collection, transfer, recycling and resource recovery, and disposal services. We are also a leading developer, operator and owner of waste-to-energy and landfill gas-to-energy facilities in the United States. Our customers include residential, commercial, industrial, and municipal customers throughout North America.

The Company, from time to time, provides estimates of financial and other data, comments on expectations relating to future periods and makes statements of opinion, view or belief about current and future events. Statements relating to future events and performance are "forward-looking statements." The forward-looking statements that the Company makes are the Company's expectations, opinion, view or belief at the point in time of issuance but may change at some future point in time. By issuing estimates or making statements based on current expectations, opinions, views or beliefs, the Company has no obligation, and is not undertaking any obligation, to update such estimates or statements or to provide any other information relating to such estimates or statements. Outlined below are some of the risks that the Company faces and that could affect our financial statements for 2007 and beyond and that could cause actual results to be materially different from those that may be set forth in forward-looking statements made by the Company. However, they are not the only risks that the Company faces. There may be additional risks that we do not presently know or that we currently believe are immaterial which could also impair our business. We caution you not to place undue reliance on any forward-looking statements, which speak only as of their dates. The following are some of the risks that we face:

- competition may negatively affect our profitability or cash flows, our price increases may have negative effects on volumes and price roll-backs and lower than average pricing to retain and attract customers may negatively affect our yield on base business;
- we may be unable to maintain or expand margins if we are unable to control costs;
- we may not be able to successfully execute or continue our operational or other margin improvement plans and programs, including pricing increases; passing on increased costs to our customers; reducing costs due to our operational improvement programs; and divesting under-performing assets and purchasing accretive businesses, any of which could negatively affect our revenues and margins;
- weather conditions cause our quarter-to-quarter results to fluctuate, and extremely harsh weather or natural disasters may cause us to temporarily shut down operations;
- inflation and resulting higher interest rates as well as other general and local economic conditions may negatively affect the volumes of waste generated, our financing costs and other expenses;

- possible changes in our estimates of site remediation requirements, final capping, closure and post-closure obligations, compliance and regulatory developments may increase our expenses;
- regulations, including regulations to limit greenhouse gas emissions, may negatively impact our business by, among other things, restricting our operations, increasing costs of operations or requiring additional capital expenditures;
- if we are unable to obtain and maintain permits needed to open, operate, and/or expand our facilities, our results of operations will be negatively impacted;
- limitations or bans on disposal or transportation of out-of-state, cross-border, or certain categories of waste, as well as mandates on the disposal of waste, can increase our expenses and reduce our revenues;
- fuel price increases or fuel supply shortages may increase our expenses, including our tax expense if Section 45K credits are phased out due to continued high crude oil prices, or restrict our ability to operate;
- increased costs to obtain financial assurance or the inadequacy of our insurance coverages could negatively impact our liquidity and increase our liabilities;
- possible charges as a result of shut-down operations, uncompleted development or expansion projects or other events may negatively affect earnings;
- fluctuating commodity prices may have negative effects on our operating revenues and expenses;
- trends requiring recycling, waste reduction at the source and prohibiting the disposal of certain types of wastes could have negative effects on volumes of waste going to landfills and waste-to-energy facilities;
- efforts by labor unions to organize our employees may increase operating expenses and we may be unable to negotiate acceptable collective bargaining agreements with those who have been chosen to be represented by unions, which could lead to labor disruptions, including strikes and lock-outs, which could adversely affect our results of operations and cash flows;
- negative outcomes of litigation or threatened litigation or governmental proceedings may increase our costs, limit our ability to conduct or expand our operations, or limit our ability to execute our business plans and strategies;
- problems with the operation of our current information technology or the development and deployment of new information systems may decrease our efficiencies and increase our costs to operate;
- the adoption of new accounting standards or interpretations may cause fluctuations in reported quarterly results of operations or adversely impact our reported results of operations; and
- we may reduce or eliminate our dividend or share repurchase program or we may need to raise additional capital if cash

flows are less than we expect or capital expenditures are more than we expect, and we may not be able to obtain any needed capital on acceptable terms.

Additional information regarding these and/or other factors that could materially affect results and the accuracy of the forward-looking statements contained herein may be found in Part I, Item 1 of the Company's Annual Report on Form 10-K for the year ended December 31, 2006.
